Index to Volume 12

Authors, Titles, and Subjects

Absorption, spectral, of oxyhemoglobin in presence of bilirubin, 509
Abstracts of papers from scientific sessions, 18th National Meeting of AACC, 519
Acetoacetate, 606
Acetone, separation by gas chromatography of, 537
Acid(s)
  acetylsalicylic, determination of in blood, 536
  amino, 144
  fecal bile, fluorometric determination of, 534
  ferricyanide-phosphomolybdic, 816
  lactic, 299, 552, 559
  mucopolysaccharides, in complex mixtures, 537
  organic, in urine, 830
  phosphotungstic, 541
  uric, 541, 748
Acid phosphatase, 528, 529
  automated determination of, 226, 289
  substrates for, 620
Acid phosphatase determination in serum (Abstract), by G. G. Rudolph, 528
Acrylamide gel electrophoresis, 542
Adenine compounds, electrophoresis of, 549
Agglutinins, 552
Aging, effect of, on mercury in urine, 837
Albumin, serum, 194, 528, 539
Aldosterone, secretion of, 525, 526
Alkaline phenol, 360
Alkaline phosphatase
  indigogenic reaction for, 529
  serum, 70
  substrate for, 482, 701
  urinary, 542
Allen, E., System of reading Auto-Analyzer charts (Scientific Note), 376
Allen, R. H., Abstract, 523
Allerhand, J., Abstract, 531
Alperin, J. B., Abstract, 538
Amador, E., Franey, R. J., and Massod, M. F., Serum glutamic-oxaloacetic transaminase activity: Diagnostic accuracy of the revised spectrophotometric and the dinitrophenylhydrazine methods, 475
Ambrose, M. E., *see* Smith, P., Jr.
American Association for the Advancement of Science, 1966 Annual Meeting, 327
American Association of Clinical Chemists
  foreign lecturer program of, 113, 250
  national election of, 1966, 644
  National Executive Committee Minutes (April 13, 1966), 454
  18th National Meeting of, 44, 175, 250, 321, 386, 446, 519, 644
    invited speakers of, 391
    scientific program of, 446
    see Abstracts of Papers from Scientific Sessions
  19th National Meeting, AACC, Philadelphia, Pa., planning committee of, 901
  policy of, on reagent sets and kits, 43
Amino acids, in blood plasma, 144

Pages 1–46, January; 47–114, February; 115–180, March; 181–252, April; 253–328, May; 329–398, June; 399–462, July; 463–558, August; 559–646, September; 647–738, October; 739–828, November; 829–924, December.

Amino nitrogen, with 1-fluoro-2,4-dinitrobenzene, 547
Amniotic fluid, in rhesus iso-immunized women, 551
Amobarbital metabolism in man: A gas chromatographic method for the estimation of hydroxyamobarbital in human urine, by J. M. Kamm and E. J. Van Loon, 789
Amylase, serum, 530 *bis*
Amyloclastic method for measuring serum amylase activities and an evaluation of various substrates (Abstract), by H. G. Biggs, 530
Analbuminemia, 25
Analysis of blood lactic acid using gas chromatography (Abstract), by J. Savory, 552
Analysis of urinary 17-ketosteroids by gas-liquid chromatography, by M. W. Ruchelman and V. W. Cole, 771
Analyzer, multichannel continuous-flow, 120
Anemia, hemolytic, with ATP levels, 538
Angiotensin I and II, 525
ANNINO, J. S.
Abstract, 547
Study of the colorimetric dinitrophenylhydrazine method for the determination of serum glutamic oxaloacetic transaminase activity, 217
Anomalous immunoglobulins in myeloma and macroglobulinemia (Abstract), by G. N. Rogentine, Jr., 519
Antitrypsin, serum, 544
Apparatus, dumbbell diffusion, 369
APPLETON, H. D., and FRIEDMAN, M. M., Harry H. Sobotka, 1899–1965: In memoriam, 115
ARREDONDO, E., Abstract, 536
Aspects of computer integrated automation in a clinical chemistry laboratory (Abstract), by E. Cotlove, 527
Assay of urinary porphyrins: Evaluation of extraction methods and choice of instrumentation, by A. A. Fernandez *et al.*, 463
Atomic absorption spectrophotometry, 338, 613
ATP, in hemolytic anemia, 538
AUERBACH, J.
see KLEIN, B.
see MORGENSTERN, S.
AutoAnalyzer, 428, 556
charts, 376
Autoclaving of blood spots on filter paper and its use in automated screening technics (Abstract), by J. Bourdillon, 540
Automated colorimetric (tetrazolium salt) assay for serum lactate dehydrogenase, by R. D. Capps, II, *et al.*, 406
Automated determination of acetoacetate in serum and urine, by B. Klein and M. Oklander, 606
Automated determination of acid phosphatase: III. An evaluation of the α-naphthylphosphate substrate for serum prostatic acid phosphatase, by B. Klein and J. Auerbach, 289
Automated determination of acid phosphatase: II. Technic for using Robot Chemist, by B. Klein *et al.*, 226
Automated determination of NAD-coupled enzymes: II. Serum lactate dehydrogenase, by S. Morgenstern *et al.*, 274
Automated determination of serum creatine phosphokinase (Abstract), by A. L. Siegel, 532
Automated determination of serum glutamic oxaloacetic transaminase, by S. Morgenstern *et al.*, 95
Automated determination of serum uric acid, by S. Morgenstern *et al.*, 748
Automated fluorometric determination of

Pages 1–46, January; 47–114, February; 115–180, March; 181–252, April; 253–328, May; 329–398, June; 399–462, July; 463–558, August; 559–646, September; 647–738, October; 739–828, November; 829–924, December.

serum magnesium (Scientific Note), M. Oklander and B. Klein, 243
Automated fluorometric procedure for serum albumin (Abstract), by B. Klein, 539
Automated measurement of erythrocyte fragility using a linearly decreasing salt gradient (Abstract), by A. M. Webb, 538
Automated method for the determination of serum creatine kinase activity (Abstract), by G. A. Fleisher, 532
Automated methods for blood glucose and urea with adaptation for simultaneous determination, by B. Fingerhut *et al.*, 570
Automatic estimation of urea using urease and alkaline phenol, by B. W. Wilson, 360
Automatic method for the determination of calcium in the presence of magnesium and phosphate ions, by P. Smith, Jr., *et al.*, 418
Automation
  computer integrated, 527
  multichannel, 137
  of wet-chemistry analysis, 554
Award
  American Chemical Society, to L. T. Skeggs, 326
  Capitol Section, 1966, to M. Rubin, 735
  National Medal of Science, to D. D. Van Slyke, 453
  Reinhold, to David Seligson, 453
  Van Slyke, 1966, to A. Saifer, 397
